DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-3, 5-7, 29, 72, and 73 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5, 7, 14-16, and 30 of U.S. Patent No. 6,001,112. Although the conflicting claims are not identical, they are not patentably distinct from each other because the relatively broad subject matter claimed in the instant application clearly would have been obvious in view of the relatively detailed subject matter of the patent claims.

3. Claims 1-3, 5, 6, 21, and 60 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5 and 30 of U.S. Patent No. 6,454,779. Although the conflicting claims are not identical, they are not patentably distinct from each other because the relatively broad subject matter claimed in the instant application clearly would have been obvious in view of the relatively detailed subject matter of the patent claims.

Art Unit: 3731

4. Claims 72 and 73 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 66, 70 and 83 of U.S. Patent No. 6,482,217. Although the conflicting claims are not identical, they are not patentably distinct from each other because the relatively broad subject matter claimed in the instant application clearly would have been obvious in view of the relatively detailed subject matter of the patent claims.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 6 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 6 and 7 recites the limitation "the rotatable tip" in lines 1 and 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-10, 21, 29-34, and 60-71 are rejected under 35 U.S.C. 102(b) as being anticipated by Sjostrom et al. (U.S. 4,705,038).

Art Unit: 3731

Sjostrom et al discloses in figures 1 and 2, an elongate flexible tubular body (25-31); a rotatable cutter disposed at the distal end of said tubular body (25-31); an aspiration lumen extending through said tubular body (25-31); a control (10,18) disposed on the proximal end of tubular body (15-31); and a sensor in electrical communication with a an indicator for indicating resistance to rotation of either the rotatable element or rotatable cutter (Col. 1-6).

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Krause et al. (U.S. 5,707,350) discloses a surgical instrument.
